to take care of your dog

LifeAssays® Canine test
kit provides a quantitative
point-of-care measurement
of canine acute phase
proteins in serum.

 **LIFEASSAYS**®
BLOOD ANALYSIS FOR LIFE

Lifeassays Canine test Kit

Acute phase proteins are important tools for diagnosis and monitoring of inflammation in dogs.

Use the kit for:

- ✓ Pre-screening: systemic inflammation or not.
- ✓ A guiding light in selecting treatment
- ✓ Treatment follow-up

LifeAssays® Canine Technical Data:

- Easy-to-use
- Quantitative: clear relation of results vs. cut-off
- Accurate
- Rapid : assay time 11 minutes
- Small sample volume: 5 µL
- Same instrument as for LifeAssays Feline and Equine tests.

LifeAssays® Veterinary Reader Technical Data:

- Easy-to-read display
- Bench-top instrument
- Disposable algorithm chip for improved system control
- Automatic measurement and result presentation
- Superior non optical system
